

- ❶ Push the lamp onto the rail strip, so that the copper sheet of the lamp is in contact with the copper strip on the rail strip and is electrified.

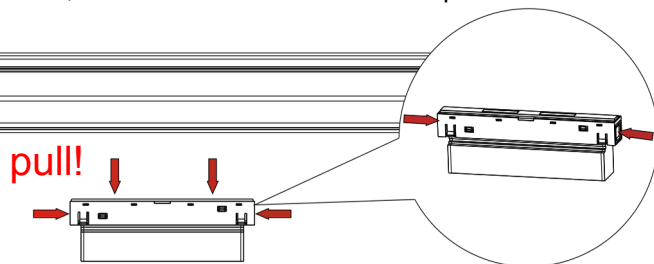

- ❷ Press the 2 end fastener of the product and push the product into the track.

- ❸ Installation completed.

- ❹ To remove the product, hold down the two ends of the product buckle and pull down.

- ❺ By analogy, other MAGNETO lamps installation method is the same.
